MITIGATION AND ADAPTATION

CIRCULAR + OCEAN ECONOMIES = SUSTAINABLE DEVELOPMENT FOR THE GREATER CARIBBEAN REGION

An underwater photograph showing a sandy ocean floor in the foreground and several translucent jellyfish floating in the water above. The water is clear and blue, with light filtering through from the surface.

Oceanographic Research Center encompasses marine science and technology, marine environmental issues such as the impact of climate change in ecosystems, including looking for solutions to urgent problems like sargassum, saving coral reefs, mangroves, and addressing marine contamination and waste management; but also looking to take advantage of the Circular and Blue Economies.
